

Andrew Mee

Front-End Web Developer

www andrewmee.com
phone +44 7722 896 793
email hello@andrewmee.com

eligibility Dual Australian and EU Citizen - Italian passport

Experience

2007—2008 Senior Front-End Web Developer
KND Web Consultants (*Brisbane, Australia*)

Created website interfaces from scratch using semantic (X)HTML and CSS

Coded rich web-based software utilising innovative JavaScript and AJAX implementations - particularly using the "MooTools" JavaScript framework

Provided front-end applications of PHP classes and data objects, and modified or extended those back-end scripts as required

Designed and implemented consistent micro-conventions for UI elements such as form feedback mechanisms

Developed all websites with an eye to SEO optimisation and usability

Crafted HTML email templates and set up mail-out campaigns

Account management - liaised directly with clients both in meetings and via the phone and internet

Conducted tutorials and provided ongoing training for other staff members (HTML, CSS, Javascript, AJAX, MooTools)

Interviewed and provided hiring advice for other prospective front-end developer employees

Drafted best practice coding standards documents for staff orientation and Q.C.

2006—2007 In-house Freelance Web Developer
Florentzos Design (*Brisbane, Australia*)

Designed and constructed websites using (X)HTML, CSS and PHP

Conceptualised and created designs for a range of media, including websites, micro-sites, stationery and packaging

Supplied advice on all web and new-media projects - including technology options, high-level usability, and budgets

Provided ongoing account management for new and existing clients

Created specification and budget documentation for new and prospective web projects

2004—2006 Freelance Web Developer
Self-Employed - various; AMD, Co-Packers, Mt Petrie State School, National Amusement Machine Operators Australia, Zoolf Software

Complete website design and construction

Established creative and technical project specifications through liaison with clients

Domain registration, hosting and email setup and maintenance

Maintained and extended existing projects
